

POINT CLOUD

Viewer: As easy as X to Z

It may only take minutes to get millions of X,Y and Z points from your scanning equipment, but through the simplicity and power of our post processing software package Point Cloud Viewer, you can convert the data to a workable format with ease.

Point Cloud Viewer has the functionality to handle the millions of points easily and get them into Model Maker to begin normal modelling.

VIRTUAL SURVEY

A virtual survey module with which data can be extracted for use in Model Maker or any other DTM software package.

FILTERING

Remove noise and audit data by classification or user defined parameters. This also module also includes geo-referencing of scanned data.

PLEASE NOTE:

PCV will only run on the 64 bit Windows platform to allow for very large data sets and is only usable as a viewer in the trial version.

APPLICABLE DISCIPLINES/FIELDS:

- Technical Surveying
- Mining Engineer
- Mining Surveyor (Opencast)
